c. Describe the purpose of this DoD information system or electronic collection and describe the types of personal information about individuals collected in the system.

The primary purpose of this system is to provide all pertinent personal information on an applicant (non-prior service or prior service) in order to determine if applicant is qualified for military service, and in what specific job qualification. Once determined, AFRISS-TF can deliver qualifying information to Mil-PDS for establishment of initial personnel and pay record, or to effect a transfer or reaffiliation (for prior-service personnel). Types of personal information include (but not limited to) name, SSN, gender, date of birth, marital status, number of dependents, security information, civil court actions/convictions, ASVAB qualification data. (Details on PII collected is provided in Section 2A of the this document)

d. Why is the PII collected and/or what is the intended use of the PII? (e.g., verification, identification, authentication, data matching, mission-related use, administrative use)

Information is collected to facilitate qualification and subsequent accession into the respective Air Component. The information is required to determine and verify the identity of the individual seeking accession. Additionally, this information is required to determine if an applicant meets minimum eligibility criteria to qualify as a member of the respective Air Service Component.

e. Do individuals have the opportunity to object to the collection of their PII? Yes No

(1) If "Yes," describe the method by which individuals can object to the collection of PII.

(2) If "No," state the reason why individuals cannot object to the collection of PII.

The recruiter shows and, upon request, provides the individual a Privacy Act Statement for each form, format, or form letter used to collect personal data before asking for the information. Individual signatures grant consent. The individual however has the opportunity at this stage to object to the collection of any/all parts of information in identifiable form. The individual is then advised this could delay the application process up to and including denial of consideration for entry into the Air Service Component.

f. Do individuals have the opportunity to consent to the specific uses of their PII? Yes No

(1) If "Yes," describe the method by which individuals can give or withhold their consent.

(2) If "No," state the reason why individuals cannot give or withhold their consent.

An individual cannot consent to specific uses of their PII. All of it is required to be considered for entry into an Air Service Component.

g. When an individual is asked to provide PII, a Privacy Act Statement (PAS) and/or a Privacy Advisory must be provided. (Check as appropriate and provide the actual wording.)
